### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 8 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

There is no antecedent basis for the "head" recited at line 2.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Mangum.

There is disclosed in Mangum a tool for draining liquid from canned foods, comprising: an elongate first arm 3; a presser 9 hingedly attached 8 to the first arm, the presser having a body 28 and a detachable foot 9 having a plurality of apertures therein; an elongate second arm 2 hingedly attached 4 to the first arm at an end thereof, the second arm including a substantially straight distal portion 17 adapted to support a can beneath the presser, the second arm further including a substantially straight handle

Art Unit: 1761

portion 13 oriented substantially parallel the distal portion and an angled connecting portion between the distal portion and handle portion.

Claims 12, 16 and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Durbin et al.

There is disclosed in Durbin a device for pressing, comprising: a top arm having proximal and distal ends; a presser disposed at a distal end of the top arm; a bottom arm having a flat first portion beneath the presser, and a substantially linear second portion forming part of a squeezing handle in cooperation with the top arm; wherein the top arm is attached to the bottom arm at its proximal end with a hinge.

In regards to the use of the device as a tool for draining liquid from canned food, such is intended use only and provides no structural limitations to the claims. It is also apparent that the device could be used to perform such a use.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 6 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mangum in view of McDonald.

McDonald discloses that it is known in the art to use a magnet attached to the foot of a presser.

It would have been obvious to one skilled in the art to provide the presser of Mangum with the magnet disclosed in McDonald, in order to remove the lid of the can when removing the presser.

***Allowable Subject Matter***

Claims 9-11 are allowed.

Claims 4, 13-15 and 18-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim 8 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Jacobson, Tranberg and Watkins, Jr. are cited for their disclosure of the state of the art.
